

WHAT WE OFFER

- Seminars, guest lecturers, panel discussions and informal lunchtime talks on the latest developments in legal technology and the law that governs it
- Space to develop new technological solutions to access-to-justice challenges
- Research assistance and advice using data science methods, tools, and open access databases to answer advanced research questions
- A physical lab space to experiment with new technologies and learn about their effect on the law and legal practice

GET INVOLVED

- **Follow us** on Twitter @lawtechlab
- **Visit our website** at <https://lawtechlab.africa>
- **Visit our physical lab space** in UCT's law faculty
- **Get in touch** to discuss research collaborations or legal tool development with legal data scientists
- **Donate to the lab**

Learn. Experiment. Grow.

LawTechLab.africa is an initiative by the iNtaka Centre for Law & Technology at the University of Cape Town. LawTechLab aims to provide a practical space for exploration and experimentation and for the development of legal tools that promote inclusiveness and access to justice in South Africa and across Africa!

What is the LawTechLab?

Recognising the transformative role technologies such as AI, blockchain and 3D printing are having on the legal landscape, the LawTechLab is an exciting new multi-disciplinary research space where law and technology meet.

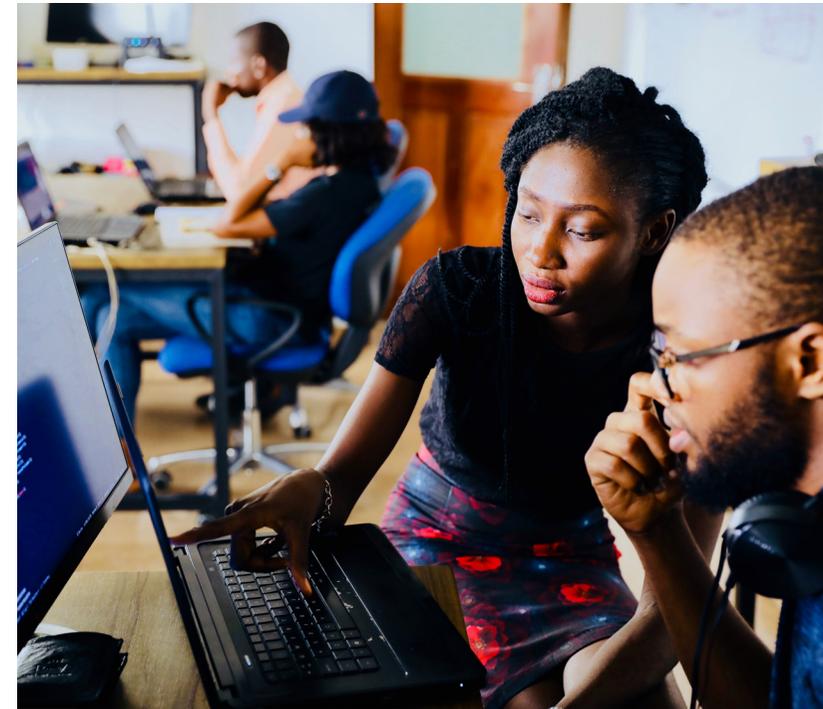

LawTechLab aims to equip Africa's law students with the knowledge and skills required for success in a rapidly changing legal landscape.

At the LawTechLab one can explore, experiment, and ultimately develop new legal tools.

INTAKA

CENTRE FOR LAW & TECHNOLOGY

It is critical that the legal profession and the law itself keep pace with new and emerging technologies in order to appropriately tackle the many legal and societal questions they raise and to effectively regulate in the digital domain.

The iNtaka Centre - an intellectual space in which one can thoroughly interrogate the effects of technology-driven advancement and disruption on law - is UCT's solution to this rapidly changing world.

The Centre seeks to shape the next generation of African lawyers, non-legal scholars and practitioners in order to prepare them to navigate the modern law and technology landscape.

The iNtaka Centre engages in Africa-focused global, regional, and domestic policy debates around technologies such as AI, blockchain and 3D printing. We use modern and advanced research methods to develop contextual knowledge in this field.

WHO WE WORK WITH

STUDENTS

At our LawTechLab students can gain hands-on experience with technologies and tools that are aimed to revolutionise the legal landscape, including practical exposure to AI, open public blockchains, and smart contracts. The lab is a space where students can learn about technology, guaranteeing a successful future legal career.

ACADEMICS, RESEARCHERS AND POLICY MAKERS

Explore collaborative opportunities for inter-disciplinary research on legal and regulatory issues in the digital space. We also offer training (including training for law and policy makers) and support in digital humanities research methods and data science research methodologies in order to facilitate research engagements with digital data. We can also assist with finding and visualising legal trends.

LEGAL PROFESSIONALS

We provide professional development opportunities and ensure you are well apprised of the issues facing your clients in a rapidly digitising business landscape. We enable legal professionals to stay at the cutting edge of legal technology innovations by promoting internal workplace efficiency, increasing the currency of legal knowledge, and enhancing effective client service.

LEGAL TECH ENTREPRENEURS

We help legal tech entrepreneurs to develop their legal tech tools. We also provide seminars, support programmes and legal tech startup competitions.

INTAKA CENTRE FOR LAW AND TECHNOLOGY

- Provides inter-faculty, interdisciplinary, and trans-disciplinary teaching, and research at the intersection of law, technology, information, science, data and society
- Creates the next generation of curious, technologically savvy African lawyers, non-legal scholars and practitioners
- Creates opportunities for dialogue and exchange of ideas at both the iNtaka Centre and online
- Innovates and helps create solutions for the African justice sector
- Provides students with the skills that they need to understand their client's business problems and holistically assess the legal issues involved to deliver legal outcomes that support the business' objectives
- Engages in public policy development by providing expert advice and advocacy to government, the private sector and civil society
